

NGUYỄN HỮU HUỲNH

FULLSTACK DEVELOPER

0907767360 | Thu Duc, Hồ Chí Minh City | huynhbutforwork@gmail.com | huynh.vercel.app

SUMMARY

A results-driven Full-Stack Developer specializing in PHP, with hands-on experience delivering and maintaining both Websites and ERP systems. Demonstrated ability to optimize system performance, reducing API response times by 20% and improving Core Web Vitals scores by up to 90%. Experienced across the full development lifecycle, from backend architecture to frontend implementation. Thrives in fast-paced, high-pressure environments while consistently delivering clean, maintainable, and reliable solutions.

EXPERIENCE

TEKVIZON SOFTWARE CO., LTD

Mar 2025 - Sep 2025

Fresher Fullstack Developer

- Developed and maintained frontend features using ReactJS and backend services with Node.js for managing car parking slots and payment integration.
- Designed and implemented RESTful APIs for booking operations and tracking parking usage.
- Optimized SQL queries to improve report generation performance.
- Collaborated closely with QA and BA teams to analyze issues and resolve critical bugs.
- Coordinated with frontend and backend developers to ensure feature alignment and smooth API integration/testing.

Outcome: Improved system stability and reduced API response time by 20%. Gained hands-on experience in performance optimization, enhanced debugging capabilities, and reinforced best practices in API design and cross-team collaboration.

BYD OWAY AUTO

Sep 2025 - Apr 2026

PHP Developer

WordPress Website Development

- Developed and maintained multiple WordPress websites, building custom UI components based on business requirements.
- Optimized website performance, significantly improving Core Web Vitals and overall loading speed across multiple showroom websites.
- Implemented custom features to support showroom events and operational needs.
- Built real-time reporting functionalities, integrating websites with ERP systems for seamless data synchronization.

ERP System Development

- Developed, refactored, and maintained ERP systems using PHP to meet evolving business requirements.
- Collaborated directly with end users to gather requirements, understand workflows, and deliver tailored solutions.

- Investigated and resolved bugs based on user feedback, ensuring system stability and reliability.
- Enhanced UI/UX and optimized API performance to improve responsiveness and overall system efficiency.

Outcome: Improved Core Web Vitals by ~70–90 points and reduced page load time by over 40%, ensuring stable UI performance. Implemented real-time synchronization between website and ERP (latency <1–2s) and optimized code to reduce API response time by ~20–30%.

PROJECTS

Cây Xanh An Phát – Business Website

Sep 2025 - Jan 2026

<https://www.cayxanhhanphat.com>

- Developed a fullstack business website using ReactJS, Next.js, Node.js, and MongoDB.
- Designed and implemented RESTful APIs to manage products, services, and business content.
- Integrated Cloudinary for image storage and optimization.
- Built responsive UI components aligned with business requirements and improved overall user experience.
- Optimized performance and enhanced Core Web Vitals, improving loading speed and SEO effectiveness.

Outcome: Improved page load time by over 50% (FCP < 1.5s), increased Core Web Vitals to >84, and reduced image size by ~60%. Maintained stable API response times under 300ms, ensuring scalability and smooth operation.

JourneyJar – Personal Journaling Web App

March 2025 - Apr 2026

<https://journeyjar.vercel.app>

- Developed a fullstack business website using ReactJS, Next.js, Node.js, and MongoDB.
- Designed and implemented RESTful APIs to manage products, services, and business content.
- Integrated Cloudinary for image storage and optimization.
- Built responsive UI components aligned with business requirements and improved overall user experience.
- Optimized performance and enhanced Core Web Vitals, improving loading speed and SEO effectiveness.

Outcome: Achieved a 100/100 PageSpeed Insights score, with optimized Core Web Vitals (LCP < 2s, CLS ~0). Reduced load time through Next.js optimization and Cloudinary, with stable API response times under 200–300ms.

SKILLS

- **Frontend:** PHP, ReactJS, Next.js, JavaScript, TypeScript, Tailwind CSS, HTML, CSS
- **Backend:** PHP, Node.js (RESTful API development)
- **Databases:** MySQL, MongoDB
- **Tools:** Git, Bitbucket, GitLab, Cloudinary, Docker
- **CMS:** WordPress

CERTIFICATIONS

TOEIC: 705/990

2025

EDUCATION

Ho Chi Minh City University of Economics and FINANCE

2021 - 2025

Software Engineering
